【TYPE OF DOCUMENT】 ABSTRACT

【SUMMARY】

【OBJECT】

To provide a floor polishing composition which can
5 reduce maintenance operations of a floor polishing film
by improving hardness, abrasion resistance, scratch
resistance and antifouling properties of the film.

【MEANS OF SOLVING PROBLEMS】

A floor polishing composition containing a film-
10 formable organic high molecular material as a main
component, which further has scaly particles, preferably
scaly silica secondary particles, blended therein as a
filler.

【SELECTED FIGURE】 No Selected Figure
